

Bringhenti Daniele

Collaboration with foreign research universities / institutes

Collaboration with the University of Murcia

I have collaborated with the Department of Communications and Information Engineering of the University of Murcia, Spain, in a research project related to the automatic orchestration and configuration of SDN switches in IoT networks.

The result of this collaboration has been the publication of a scientific paper:

- “Automatic, verifiable and optimized policy-based security enforcement for SDN-aware IoT networks”, Daniele Bringhenti, Jalolliddin Yusupov, Alejandro Molina Zarca, Fulvio Valenza, Riccardo Sisto, Jorge Bernal Bernabe, Antonio Skarmeta, in Elsevier Computer Networks, 25th June 2022, DOI: 10.1016/j.comnet.2022.109123, <https://www.sciencedirect.com/science/article/abs/pii/S1389128622002468>

Collaboration within the European project ASTRID

In the context of the European project ASTRID, where I served as Task Leader of Task 2.4 “Orchestration”, I have collaborated with the DTU, TUB, CNR-IMATI universities/research institutes. The result of this joint work has been discussed in the Deliverable D2.7 “Secure orchestration infrastructure”:
