eCard

GSK

Hello Camilla, With this e-Card, I would like to thank you for the support you gave for SUV project (shear stress in tubing). It really helped us to improve our experiments in the lab to improve representativity. I appreciated having your nice slide decks as reference in our PEs, side explanations to better understand your calculations and the fact that you dared to highlight the tricky points for MMRV to help us to take the best decision. I would like also to thank you for your rapidity and always meeting the tight deadlines despite your other commitments. Deborah
