Oggetto: PhD Days 2022 - Awards final communication

Dear PhD students, dear colleagues,

I am glad to communicate the recipients of the prizes for both excellence in oral presentation (for the 35th cycle PhD students) and for the best digital poster (for the 36th and 37th cycles PhD students) presented at the Energetics PhD Days 2022, held on 2022 December 19, 20 and 21.

I apologize for the huge delay in this communication but, due to some irregularities occurred in the public rating of the speakers, the evaluation required further work by the Energetics PhD Board, and, in addition to that, in the last months the work load due to a number of new bureaucratic procedures requested by the Minister for Research has been overwhelming, forcing me to postpone further and further this communication.

Finally, the Energetics PhD Board Members have established the following winners:

35th Cycle

- Matteo Bilardo
- Francesco M. Bellussi
- Fabrizio Gullino
- Alberto Moscatello

36th Cycle

1. Sofia Viarengo
2. Cristiano Segatori
3. Alessandro Ribezzo

37th Cycle

1. Andrea Scalambro
2. Giuseppe Castellano; Gabriele Ferrero; Francesco Pucillo (*ex aequo*)

The special prize consists in a book (digital/physical format) of the PhD Student's own choice (for a maximum value of about 100€). The chosen book must be communicated to the DENERG Librarian, Anna Perotti through e-mail (anna.perotti@polito.it) at the earliest convenience of the winners.

Congratulations to the awarded students and thanks everyone for the wide participation!

Regards,

Federico Millo

Energetics PhD Coordinator
