**Oggetto:** Your Paper with WCX

Dear Massimiliana Carello,

I am writing to tell you that, as one of the best papers for WCX, your paper "Experimental Characterization of Piezoelectric Transducers for Automotive Composite Structural Health Monitoring" has been selected to appear in *SAE International Journal of Advances and Current Practices in Mobility*, SAE's online journal celebrating the very best papers from our events. Your paper will retain the same paper number and DOI, but the journal version (with full journal citation) will replace the conference version in Mobilus®. Please find more information here: <https://www.sae.org/publications/collections/content/E-JOURNAL-99/>

In the weeks ahead, you may receive communication from our Intellectual Property (IP) team in regard to any questions about permissions for reusing content from another source and to clarify if such permissions are needed. To help ensure that your publication is not delayed, please be prepared to list the copyright holder and permission status for each chart, figure, graph, or image.

Please note that, if interested, SAE offers our authors Open Access for USD\$750. Please feel free to reach out with questions about this option.

Congratulations on your selection to this journal!

Best regards,  
The Editorial Team  
Advances and Current Practices in Mobility
